

Network Solutions

Knowledge and Expertise of Current and Emerging Technologies is our Business.

We can show you how applying current and emerging technologies can help replace revenues that are eroding under competitive pressure, line loss and reduction in high cost support.

CHR's innovative engineering design price models, offer flexible Outside Plant and FTTx pricing. We provide both Time and Expense and Unit Based pricing to remove the guess work from your cost. Depending on scope, unit prices can be defined by the passing, foot or pole. Unit based pricing models ensure you are paying for production, not just time. CHR's scope of work defines these fixed-price units for easy reference.

Professional Engineering and Outside Plant

- Network Planning & Design
- PE Certifications in most states
- Plans & Specifications Preparation
- Complete Project Management
- Outside Plant Engineering
- Grounding Audits
- RUS/Co-Bank Loans and Grant Applications
- Wireless Engineering
- Construction Management
- Network Evolution Plans
- Facilities management system integration

FTTx

- Active Ethernet
- GPON and RFOG
- Aerial and Buried
- Splitter Placement
- Service Integration
- Copper Migration and Feasibility Study
- Product Recommendations
- OSP Layout & Design
- OSP Staking Services
- OSP Inspection Services
- Residential & Commercial (including multi-dwelling) design & deployment

CHR's Construction-Friendly Design and Staking Reduces Costs. Call Today!
